This is Free Additional Money-Making training worth as much as an additional \$10,732. – **Keep reading for details and See Chart Enclosed**. Note: some bonuses available in limited quantities, enroll now!

Can you see *yourself* as a Gunsmith?! Looking forward to each day, being your own boss, *part-time* or *full-time*, with the security of an additional income, having the *respect* of your friends and the community, able to buy the tools and toys that you want, while enjoying working on guns and making money?! How Cool would that be?!

*You requested information* from AGI on how to become a Certified Professional Gunsmith through the American Gunsmithing Institute's trade-school, home-study, video instruction, Gunsmithing courses. *Here's how you can:*

- Study Gunsmithing, get Certified, and work from home in your spare time.
- Learn Complete Firearms Design, Function, and Repair & Customizing Training. (So, you won't be just a "parts swapper").
- Be Taught by true Master Gunsmiths (With a combined experience of over 400 years Gunsmithing!). **Plus,....**

- Study at your own pace, no deadlines, no writing essays or book reports.
- Video instruction with close ups and cutaway guns so you can see inside.
- Watch and Listen to Learn, very little reading required. - Online Testing.
- Rewind and review as often as you need to.
- No pressure from being embarrassed or “put on the spot” in a Classroom setting.
- Guns not needed. Video coverage is so complete and close-up that you don’t even need to have the firearms that are being covered. But we also teach you where to find the guns and even get paid to clean and study them.
- Support from Professional Gunsmiths who have been there, seen that, done that.
- In as little as 90 days you can legally be Gunsmithing for profit! We show you how step-by-step
- We even provide you with a step-by-step “Road Map” to getting your FFL.

**After you study the AGI Professional Gunsmithing Course and get your certifications, you will be able to pick up ANY firearm, analyze the systems that it uses, determine the problem, and make the repair.**

For over 31 years, The American Gunsmithing Institute (AGI) has completely revolutionized the teaching methods by which the art and craft of gunsmithing is taught, – By providing thousands of people just like you with Professional Level instruction through our study-at-home, video instruction, Gunsmithing Courses. You can read their testimonials and watch the video interviews on the [www.AmericanGunsmithingInstitute.com](http://www.AmericanGunsmithingInstitute.com) website.

AGI’s courses use video instruction to provide close up views and detailed cutaway guns to clearly demonstrate the core principles of **Design, Function, and Repair. We also teach you advanced customizing and building techniques.** The complete system is taught to you by the Grandmaster of Gunsmithing, Senior Instructor Robert “Bob” Dunlap, along with several other AGI Master Gunsmith Instructors.

**Have you watched the DVD video we included with the Special Report that you requested? It shows you the teaching method with actual lessons and even takes you on a tour of a real Gunsmithing shop. (If you lost or misplaced the information, you can read the report and view the video Online at [www.GunsmithingCourse.com](http://www.GunsmithingCourse.com) .) Or use this QR Code to watch the SAME Introductory Lesson now:**

**The American Gunsmithing Institute teaches you Complete Firearms Design, Function, and Repair (D,F,&R) – This exclusive AGI process is what teaches you how to analyze firearm failures, quickly determine the cause, and be able to make the appropriate repair. This is REAL gunsmithing!**

**Depending on the level of Gunsmithing training you choose, you will also learn:**

- How to Tune and Customize Pistols and Revolvers
- Building Custom Hunting Rifles and Long Range Shooting Rifles
- Refinish Firearms, including; Hot Caustic Bluing, Parkerizing, Slow Rust and Nitre Bluing
- Making Springs and Heat-Treating Parts
- Machining, including; Setup and operation of a Lathe, Mill and General Machine Shop Equipment
- Welding; Gas, MIG, Arc, and TIG

- Training on How to Operate a Successful Gunsmithing Business
- AND More!

**You will be actually Gunsmithing in days and weeks, not waiting for years!**

**We even include the entire step-by-step, “How-to get your FFL” Licensing Package with your enrollment in any level of the AGI Professional Gunsmithing course.**

By enrolling in AGI’s courses, you will get a MORE complete education, on a greater number of Gunsmithing specific topics, in a shorter period of time, than even if you attended a “Campus Based school”

**All without;** Having to quit your job and move, Without having to Spend \$25,000 a year for Two to Four YEARS, PLUS Living Expenses, and WITHOUT all the wasted time that goes on at a typical school.

Other schools do not teach Firearms Design, Function, and Repair (D,F, & R) at the advanced level that the American Gunsmithing Institute does. They also don’t teach all the Customizing and Advanced Subjects that AGI does.

**THREE Major Differences** between other Gunsmithing Schools and what we do at AGI. First of all...

### **#1 – The Difference Between Working as a “Parts Swapper” and a Professional Gunsmith...**

**A real Gunsmith understands complete firearms Design, Function, and Repair, That’s the minimum education that you need have to be an actual Gunsmith.** Other courses teach you to be a more or less a glorified “parts swapper”... someone who just orders and installs parts until the problem goes away. (If they get lucky!) Because....

**A “Parts Swapper”** doesn’t understand exactly what’s going on or how all the internal systems work together. He CAN look a gun over and see that maybe this part or that part is broken. So he’ll order a new part, drop it in, and see what happens. Maybe it’ll fix the situation, maybe not...and if it needs fitting....

At those other schools, there’s no effort to really teach a complete understanding the “why” of what’s going wrong or the “how” what you’re doing fixes it. It’s basically just plug and *pray*. I am sure you will agree, that’s a dangerous path to go down. Not what I would be willing to do. Often these are the same kind of guys you will find posting their “*wisdom*” on YouTube. Beware!!

A true GUNSMITH trained in Design, Function, and Repair, (D,F,&R), is able to fully analyze the firearm’s systems, determine what is wrong, and then make the appropriate repair... often with existing parts.

- This means that if a part is broken, an AGI trained Gunsmith can fix it.
- If it is missing, they can make a new part, and even heat treat it when needed.
- Be able to understand and be sure that whatever they do will function properly and safely.

**#2 – The Huge Difference in overall Costs Between On-Campus and AGI’s study-at-home video training system;** Trouble is, even if you wanted to go the campus-based school route, it is extremely hard these days for the average person to be able to afford the cost and time. You see, it’s not just the cost of tuition. You have to factor in stuff like room, board, books, materials, travel to and from school, and a whole bunch of other expenses that really do add up. Instead, with AGI, you could be Gunsmithing for profit in as little as 3 months.

The total investment in even AGI's *highest level training*, the Advanced Master Professional Gunsmithing Course, is equal to four years at a Campus based, still *far less* than what you'd have to pay out of pocket for even a single year.

What if you could make just an extra \$2,000 per month Gunsmithing part-time over the next 10 years? That would total almost \$240,000 in extra income! What could you do with the extra income? The potential is that If you were to work full-time, work efficiently and follow everything we teach you, it is possible to generate as much \$8,000-\$10,000 per month Gunsmithing.

It is up to you, we don't make any income promises, BUT consider this; if you don't find a way to make extra income, then the threat of Inflation, Recession, or being laid off is just plain scary! Especially in Retirement, you don't want to run out of money!

Plus, when you factor in the additional knowledge available ONLY through AGI's training, the advanced levels of instruction on topics like; Welding, Machining, Custom Pistol and Rifle building, business development, and much more in our Master Gunsmithing Course- You will have additional skills that you can use to make money! This is an investment in your future. There really is no comparison.

### **#3 – The Difference in *SPEED* and How Fast Can You Actually be a Real Gunsmith:**

I've ALWAYS been about *Fast*. Learning fast. Doing fast. Getting to the bottom line fast. But in regular schools – even regular Gunsmithing schools - classes get taught at the speed of the slowest learner in class. So, if you're highly motivated or this training "just clicks" for you, in *those schools* you wind up spinning your wheels as you have to wait for somebody else to catch up. It drives me crazy!

With this self-paced training system, *You* get to decide how long it will take to complete your training and start your Gunsmithing Business.

**There is no other Gunsmithing Course that contains the depth and detail of the AGI Certified Professional Gunsmithing Course.** That is why the American Gunsmithing Institute has been called "The Harvard of Gunsmithing Schools" by our Students. No other course provides the level of Design, Function, and Repair that we do. With the ability for you to review it again and again as often as needed.

Just go to the Master Index and find the right video and watch it a second, third, even fourth time until you get it down pat. Gunsmithing Instruction taught by true Master Gunsmiths, available whenever you need it!! Try asking for that in a regular class... Ain't gonna happen. So here's the bottom line...

**The American Gunsmithing Institute provides the Only *Video-Based, Study at Home, Certified Professional Level, Firearms Design, Function, & Repair Gunsmithing Course Available . . . Anywhere, At Any Price!***

**Our video instruction** is actually *easier to follow than it ever could be in any classroom*. The camera gives you close-ups you could never see from 3 feet away . . . let alone in the back of the room. **You'll watch in amazement** as Bob Dunlap and other AGI Master Gunsmiths walk you through step-by-step, teaching firearms knowledge with camera catching every detail – a feat IMPOSSIBLE to get in a live classroom setting. **The end result:** training more detailed & more complete than any other Gunsmithing School.

**Gunsmithing Your Way!:** Few businesses offer the flexibility and freedom that Gunsmithing provides. It is a low cost start up business, and as long as you have the right training. You can be safely and Professionally Gunsmithing in as little as 90 days!! You only need a small space. You can get started with as little as 4 to 6 feet of bench space in your garage, shop, or spare room, and a few hand tools. Watch the introductory video lesson at [www.GunsmithingCourse.com](http://www.GunsmithingCourse.com) and see a working Gunsmith's Shop!

Many Gunsmiths work part-time evenings or weekends, to make extra money to pay for their "toys" or add to their savings. Others want to work full time as a Gunsmith or do it as a retirement income. But it is up to you to decide how much you want to do and how much money you want to make. A huge demand for Gunsmiths certainly exists. Our students often have a backlog of Gunsmithing work and tell us that they have more fun doing Gunsmithing than just about anything else. Plus, they enjoy the respect and praise that they receive from their friends and customers.

It is quite possible that just like many of our students, you might have so much fun Gunsmithing that you will want to "Fire your Boss", quit your job, and become a Gunsmith full-time. Then you can control your own life and schedule. It is really up to you. Once you have acquired these skills through this training system and are an AGI Certified Gunsmith, you get to decide. This type of Knowledge and the Skills it provides you with are actually more valuable than Gold.

Call **1-800-797-0867** for all the details or enroll online at [www.AmericanGunsmithingInstitute.com/courses](http://www.AmericanGunsmithingInstitute.com/courses) **Enroll now and get the Enclosed Limited Time Bonuses** (see the included list on the enclosed flier. Bonuses included only with paid in full enrollments). **Or use this QR Code to Enroll Online: USE CODE: TOOLS26 at Checkout to get Bonuses!**

**These are the FREE Fast Start Professional Gunsmithing Tools that are Included if you Enroll Before 4/30/26! Also, See the enclosed Bonus Chart for Details.** (Note: some items are limited in quantity. Enroll now)

A basic **Gunsmithing hand tool set** consisting of a 4 ounce ballpeen hammer, a brass hammer, screwdriver set, brass and steel pin punch set. This is really all you need to disassemble and reassemble most firearms and you will be using them on almost every firearm that you work on.

**Foredom Rotary Gunsmithing tool**, which is a power tool that you will use MORE than any other in your Gunsmithing shop. It features an adjustable hand chuck on a flex shaft with a foot pedal speed control, and comes with a set of; drills, grinding wheels, cut-off disks, end mills, polishing media and more. With this tool you can fit, polish, shape, and even cut out and make a part from scratch!

You do need a Gunsmithing vise to hold your work and the **Versa-Vise** type is in my opinion the best general-purpose Gunsmithing vise. It is a bench mounted, parallel jaw vise, that spins 360 degrees and locks. This vise is fast to use, has smooth no-mar jaws, and will accept padded jaw inserts. This is different from the typical machinist or mechanic's vise that most people have and is in my opinion a must have.

The **Tipton Gun Vise** is a handy long gun (rifle or shotgun) cradle that securely holds a complete firearm for cleaning, scope mounting, or repair. This device gives you the extra set of "hands" that ensures that you don't drop or damage the firearm when you are working on it. It also holds the firearm at a convenient angle for when you are cleaning it.

A **recoil pad grinding fixture** will help you fit and install new or replacement recoil pads quickly, which is a common Gunsmithing job.

After you quickly mount a scope, using the exclusive **Holland Perfect Scope Mounting Fixture** and then using the **laser bore sighter** you will quickly dial in a customer's scope so that he will be "on paper" and is ready to go to the range for final sighting in. *See the chart on page 7 for details!*

The ultimate way to clean firearms quickly and get more maintenance and repair jobs into your shop is to use a **Professional Grade, Ultrasonic Gun Cleaner**. (AGI has selected what we feel is the best unit on the market and have even included AGI's **complete series of training videos** to help you clean guns faster with this tool along with a **fill-in-the-blank marketing package** that includes; fliers, posters, postcards and business card templates. To see this Money-Making Gun Cleaning Package, go to: [www.AgiProGunCleaningSystem.com](http://www.AgiProGunCleaningSystem.com)

While you will be constantly wanting new tools and capabilities, the reality is that **the above tools will get you started Gunsmithing fast!** *See the enclosed Bonus Chart for Details on tools you get with each course level!*

There are so many advantages of having your own business that you control. Plus being a Gunsmith is Fun, but it is also cool that you can use it to pay for your guns, ammo, tools and "Toys", with extra money that doesn't come from the family budget! You'll especially enjoy the respect you get from your friends and customers.

**To get the tools as a bonus you have to get started soon, so you should do it now.** Pick up the phone and give an AGI student advisor a call at **1-800-797-0867** and they will help you determine what level of training is best for you. Or you can go **self-enroll** at [www.AmericanGunsmithingInstitute.com](http://www.AmericanGunsmithingInstitute.com)

**NOTE:** To get the tools and bonus training be sure to mention or enter at checkout code: **TOOLS26**  
Time slides by quickly, so get started Fast with these extra tool bonuses and change your life. BE a Gunsmith.

If you need to, ask your significant other if it is o.k. with them if you invest in yourself and the future by becoming a Gunsmith and therefore can provide security, with an extra income for yourself and family.
